

Now available: Catalyst Cortisol Test.

In-clinic results with built-in interpretation, so you have clear next steps for managing Addison's disease and Cushing's syndrome.

- + Accurate and precise.**
The Catalyst® Cortisol Test delivers accurate, precise, quantitative results with excellent correlation to testing provided by IDEXX Reference Laboratories.
- + Quickly identify or rule out Addison's disease.**
Easily screen dogs for Addison's disease by either ruling it out with a single resting cortisol measurement or confirming the diagnosis using an ACTH stimulation testing—ideally performed alongside initial blood tests at the time of presentation.
- + Diagnose and monitor Cushing's syndrome.**
Perform adrenal testing during the patient visit, and send owners home with a comprehensive plan.
- + Load-and-go workflow.**
Running this test using a familiar workflow means that no extra training is needed. Six tests per box for simple storage.

Built-in results interpretation.
Receive result-specific analysis integrated seamlessly with other diagnostic results – so that you can act with confidence.
